

OPERATING PROCEDURES – eCO₂care REGISTRY

1. GENERAL

The eCO₂care VER Registry provides access to third party certified projects of GHG (Green House Gases) emissions reduction and provides the amount of VERs credits related to not-emitted or fixed CO₂.

Projects and VERs credits databases are publicly available on the website. Exclusively account holders will be able to operate in the registry.

2. ACCOUNT REGISTRATION

To register or to update an Account (Project proponent or Trader), the following procedure applies:

1. The applicant completes the online registration form;
2. After a data check, eCO₂care Registry Administrator sends an invoice to the applicant, according to the Price List;
3. The applicant provides the proof of payment;
4. The eCO₂care Registry Administrator creates the Account and provides the login details.

3. PROJECTS REGISTRATION

Projects registration to eCO₂care VER Registry can be requested only after the third party VER certification process. To register a new project, the following procedure applies:

1. The registered Project Proponent Account (see §2) completes the online registration form providing project(s) details and requested documentation;
2. After a data check, eCO₂care Registry Administrator sends an invoice to the applicant;
3. The applicant provides the proof of payment;
4. The eCO₂care Registry Administrator updates the Registry Website with projects' details and credits.

4. VALIDITY

The Account registration is valid for an unlimited period, unless Account closure request.

5. PAYMENTS

The Applicant should comply with the economic conditions defined in Price List - eCO₂care Registry or in a confidential CESISP document.

By registering, you agree to accept the "Terms of Use" of eCO₂care Registry.
